

ASHEERWAD MEHER

Sonepur, Odisha — +91 8763340197 — asheerwad.sonepur@gmail.com — LinkedIn

SUMMARY

B.Tech Computer Science student with 1.5+ years of freelance experience in UI/UX and Graphic Design, specializing in designing intuitive, user-centered digital experiences. Skilled in Figma, wireframing, prototyping, and responsive design, with additional expertise in Python, JavaScript, and frontend development. Familiar with machine learning frameworks (Scikit-learn, TensorFlow, PyTorch) and modern development tools including Linux, AWS, and GitHub Actions.

EDUCATION

B.Tech in Computer Science and Engineering
VIT-Bhopal University

CGPA: 8.11

2023 – 2027

SKILLS and TOOLS

UI/UX Design: Figma, Wireframing, Prototyping, User Flows, Design Systems, Responsive Design

Design Principles: User Research, Usability, Interaction Design, Visual Hierarchy

Development: HTML, CSS, JavaScript, React.js, Full-Stack Development

Graphic & Visual Design: Adobe Photoshop, Adobe InDesign, Branding, Poster Design, Social Media Design

Motion Design: Adobe After Effects, Adobe Premiere Pro, Motion Graphics

Core Knowledge: UI/UX Design, User Research, Wireframing & Prototyping, Interaction Design, Responsive & Mobile-First Design, Design Systems, Usability & Accessibility Principles, Frontend Development, Full-Stack Web Development, REST APIs, Motion Graphics, Visual Communication

WORK EXPERIENCE

Freelance UI/UX & Graphic Designer — Self-Employed — Remote

Aug 2024 – Present

- Designed 20+ UI interfaces, social media creatives, and marketing assets for freelance clients.
- Created wireframes, user flows, and interactive prototypes in Figma for user-centered digital products.
- Produced posters, thumbnails, and motion graphics using Adobe Creative Cloud.

PROJECTS

Chapter Genesis — Gamified Online Reading Platform

Sept 2024 – Dec 2024

- Designed a gamified UI/UX system that promotes daily reading through streak tracking, multiplayer challenges, and progress dashboards.
- Created wireframes, user flows, and high-fidelity prototypes in Figma, improving usability and engagement for the reading platform.
- Built responsive interfaces using MERN stack + Tailwind, implementing features like reading progress tracking, streak systems, and multiplayer interaction concepts.
- **Tools:** Figma, MERN Stack, Tailwind CSS, HTML, CSS, JavaScript, Git/GitHub

Advanced Machine Learning Technologies on Fusion Big Data

Feb 2025 – Apr 2025

- Built an ML pipeline to analyze fusion big data (14,663+ experimental records with 25 input parameters) using preprocessing, normalization, and PCA dimensionality reduction (to 6 components).
- Implemented and benchmarked 6+ regression models (Linear Regression, Random Forest, Extra Trees, KNN, SVR, Neural Networks), achieving $R^2 = 0.83$ (Extra Trees) and $R^2 = 0.76$ (Random Forest).
- Developed a deep learning MLP with PyTorch, trained using 80/20 train-test split and cross-validation, enabling scalable analysis of high-dimensional multi-output datasets.
- **Tools:** Python, Scikit-learn, PyTorch, Keras, NumPy, Pandas, Matplotlib

CERTIFICATIONS

Python Basics — HackerRank

May 2024

Programming in Java — Vitvarthi

Apr 2025

Introduction to Machine Learning — IIT Madras

July 2025

Marketing Analytics — IIT Kharagpur

Jan 2025

LEADERSHIP & ACTIVITIES

Editor, Photography Team — Metaversity Club — VIT-Bhopal University

- Led visual content editing and post-production for club events.

Member — **Insights Club** — VIT-Bhopal University

- Participated in innovation-driven student initiatives and collaborative projects.
